**Priyanshu Hirpara**

---

# PROBLEM DESCRIPTION

---

**The main issue in helping the poor is not the willingness to donate but the lack of time and extra effort.**

**Our solution for this problem and the issue for NGOs is not lack of time or volunteers but resources.**

**There are people with resources(clothes,toys,money,etc.) and NGOs with volunteers but the barrier between the donor and NGOs is a lack of trust.**

**Despite of willingness to donate, donors hesitate to help because of a lack of transparency in Donations.**

---

# SOLUTION

---

**We are creating a solution for this, which will make these transactions transparent.**

**Through our webpage, donor will upload the photo of the item they want to donate.**

**Verified NGOs will come to know about their item and NGO will send a volunteer to collect the item from the their home.**

**When NGO donates their item to the poor, they will click a photo of that and the donor will be notified with the photo.**
